Three Dimensional *Vision*

3D wall tiles are a strategic project for SemnanTile, which has for a long time invested energy and resources to create increasingly beautiful and innovative surfaces.

3D Tile Structure is the most stage of Semnan Tile Strategy, and it confirms that three-dimensional wall tiles are complete, elegant features capable of infusing style and design into any type of interior space.

The interaction between light and shadows originating from the study of the reliefs and patterns of 3D Wall Carve allows you to design each space with a scenic effect of visual continuity. The result brings the three-dimensional decoration of indoor walls into a new dimension of contemporary interior design, where subtraction adds and simplicity enriches.

The bright of 3D highlights texture across the entire surface of the wall make your space elegant and creates contemporary spaces with a natural mood.

Marble Look

Throughout history, marble has been the peak of luxury. Our innovative technology has provided us the ability to duplicate marble's magnificent veining to such a degree, it is almost impossible to distinguish between natural stone marble and marble look porcelain.
